### The Solution for your Site's Infrastructure

Whatever your project, ACF Electrical Solutions can design, install & commission every aspect of your electrical & power system needs.

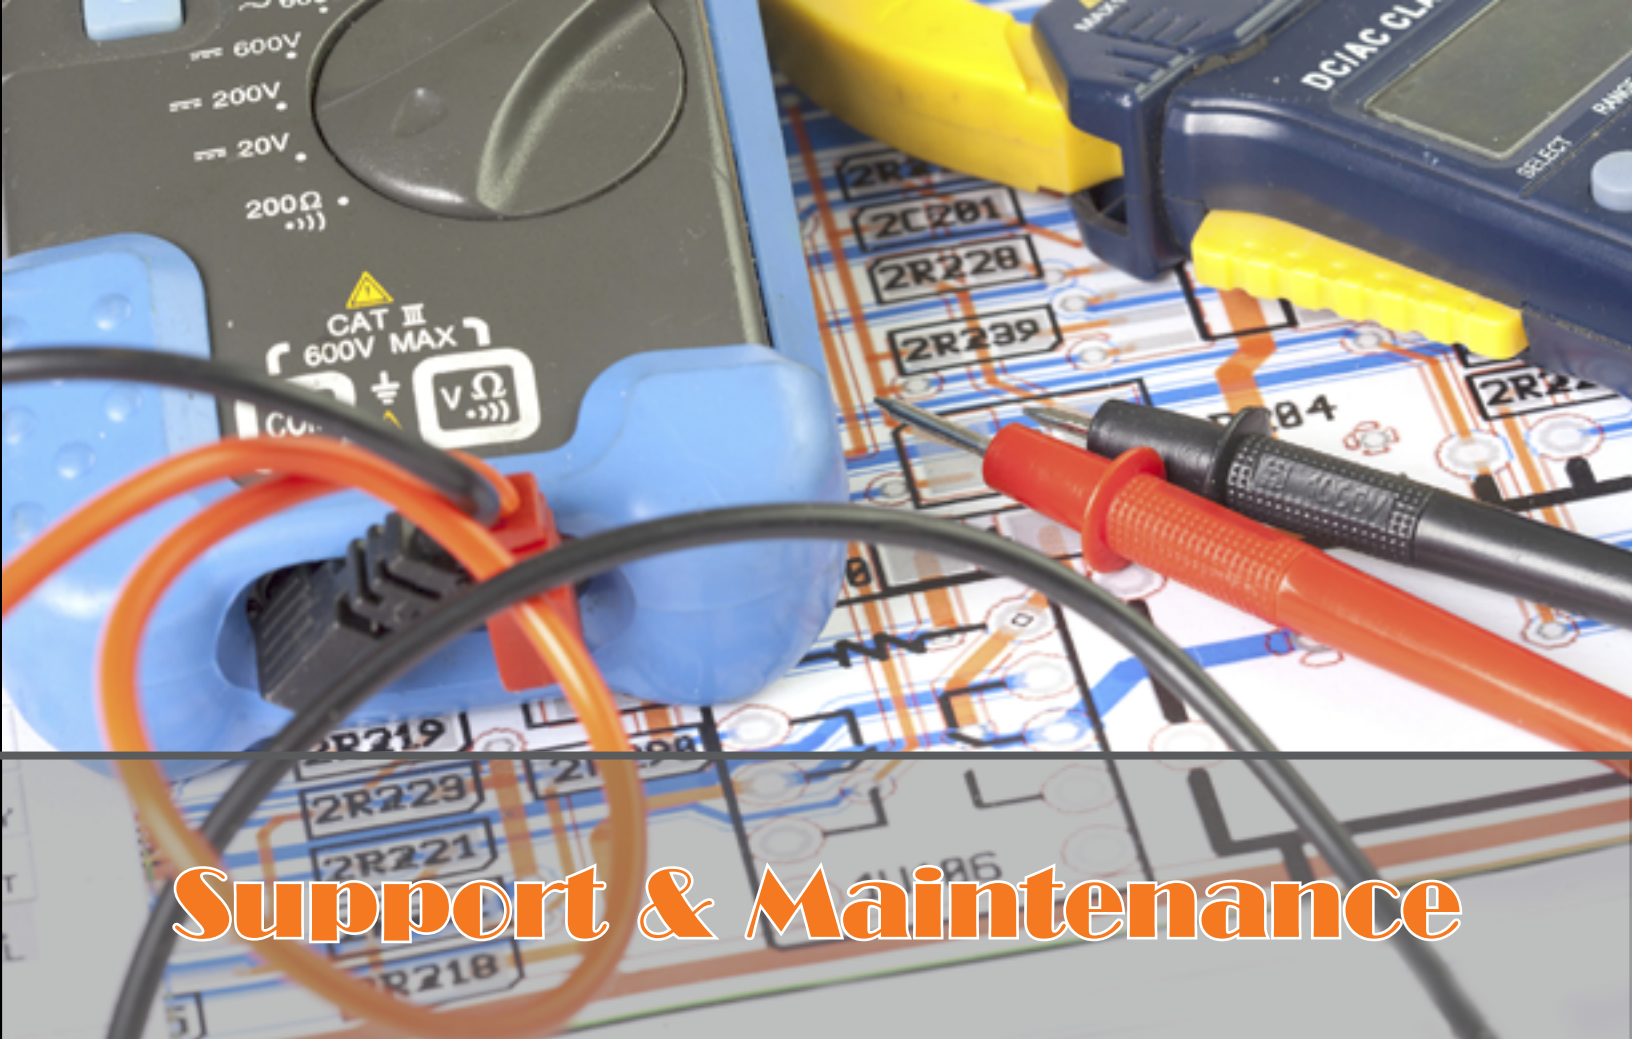

## Energy Management

**Our Energy Management Services Include:** Your building could be transformed into a smart building by simply looking at the running costs of the facility and working out where wasted energy is going. In doing so we can tailor a solution to minimise wasted energy that ultimately saves money off your bottom line.

- Energy Audits
- Lighting Control
- Data Logging
- Energy Metering
- Power Factor Correction
- Voltage Optimisation

# Support & Maintenance

## Our Maintenance Support Includes:

- 24 hour emergency call out
- Critical equipment upgrades
- Thermal Imaging
- Preventative maintenance solutions
- Test & Tag equipment
